

My Nose

My nose is very close to me,
my little pointy friend.
It's bumpy in the middle
and squashy at the end.

My hooter's very helpful,
it's such a perfect size.
It stops my forehead falling down
and separates my eyes.

My nose is simply wonderful,
it always aims to please.
It points out where I'm going
and dribbles when I sneeze.

My snout I couldn't do without,
for even though it's thin,
it's great for resting glasses on
and keeping bogeys in!
